

Medium Term Planning		Half Term 3	Class 3
	Year 5	Year 6	
Week 1	Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths Recognising mixed numbers and improper fractions and convert from one form to another. Write mathematical statements >1 as a mixed number	Use common factors to simplify fractions; use common multiples to express fractions with the same denomination Review mixed numbers and improper fractions and convert from one form to another. Write mathematical statements >1 as a mixed number	
Week 2	Recognise mixed numbers and improper fractions and convert from one form to another. Write mathematical statements >1 as a mixed number Compare and order fractions whose denominators are all multiples of the same number	Review mixed numbers and improper fractions and convert from one form to another. Write mathematical statements >1 as a mixed number Use common factors to simplify fractions; use common multiples to express fractions with the same denomination Compare and order fractions, including fractions >1	
Week 3	Compare and order fractions whose denominators are all multiples of the same number Adding and subtracting fractions with the same denominator or denominators which are multiples of the same number Recognise mixed numbers and improper fractions and convert from one form to another. Write mathematical statements >1 as a mixed number Adding fractions with the same denominator or denominators which are multiples of the same number (3 or more fractions)	Use common factors to simplify fractions; use common multiples to express fractions with the same denomination Compare and order fractions, including fractions >1 Compare and order fractions using common numerators Add fractions using the concept of Adding range of fractions including mixed numbers and improper fractions equivalent fractions	
Week 4	Subtracting fractions with the same denominator or denominators which are multiples of the same number	Subtract fractions using the concept of subtracting range of fractions including mixed numbers and improper fractions equivalent fractions	
Week 5	Multiply proper fractions and mixed numbers by whole numbers	Multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $1/4 \times 1/2 = 1/8$	
Week 6	Review previous learning Finding fractions of the whole	Divide proper fractions by whole numbers [for example, $1/3 \div 2 = 1/6$]
